Concepts

- Content Management system describing metadata and contact coordinate of European museums and collections

- Provides a global view of natural science collection holding institutes.

- Facilitates discoverability of European collections

- Assists high-level reporting; digitisation prioritisation. Show cases uniqueness.

- Is nourished with a more automated and direct data entry and updating.

Welcome

CETAF's 35 members represent 61 institutions that hold over half the world's biological collections and work in over 100 collaborative projects. Our Members explore and document the natural world focusing on studying the species and their evolutionary history. In doing so, they contribute in the advancement of research in a multitude of disciplines.

Linkage

- Linkage with controlled vocabularies
  - Collection classification derived from Synthesys/ICEDIG
  - JACS3 for research domains
  - TDWG ecological areas
  - DarwinCore categories

- Possible linkage with other system to get / provide collection metadata (via ElasticSearch)
  - E.g. GeoCASE (as input)
  - DISSCO (as output)
